

NetFrontTM Sync Client

Personal Information Management and Data Synchronization Solution for Embedded Systems

NetFront Sync Client are personal information management and data synchronization solution for embedded devices.

This is a personal information manager that is ideal for managing Address Books, Calendars, Schedules, Memo pad and To-Do Lists

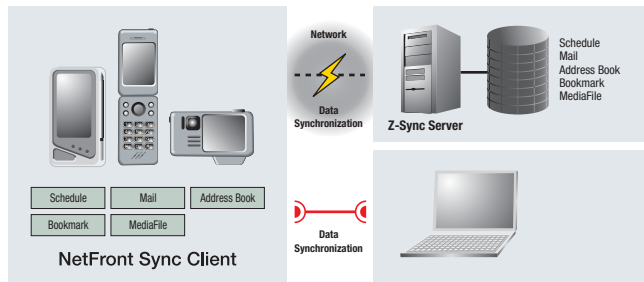

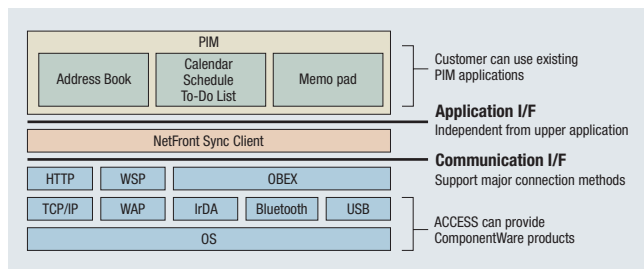

as well as multimedia files. NetFront Sync Client can synchronize data between devices and external SyncML servers. NetFront Sync Client is compliant with OMA* SyncML v1.1.2 and plans to support SyncML DM (Device Management) as well as SyncML DS (Data Synchronization). SyncML DM rules the procedure for changing device settings from servers and for updating device software.

*OMA: Open Mobile Alliance

More than 200 companies have joined OMA's SyncML initiative, to standardize SyncML on mobile wireless devices.

Configuration of NetFront Sync Client

*NetFront Sync Client-compatible Sync server is also available. For additional information, please contact us.

Features of NetFront Sync Client

- OMA SyncML v1.1.2 compliant SyncML client library
- Supports SyncML DS (Data Synchronization)
- Plan to support SyncML DM (Device Management)
- Change device settings from server side (Function of SyncML DM) - install software updates from remote server
- Supports user authentication by using account name, password and/or MD5
- Supports XML and WBXML format
- Supports both blocking and non-blocking communication modes
- Easy to port on various devices
- Independent from OS/CPU
- Supports HTTP, OBEX, WSP
- Independent from communication transport layer
- Supports various connectivity standards like USB, IrDA, and Bluetooth(R)
- ACCESS can provide other Internet components such as NetFront browser, IrFront IrDA protocol stack, AVE-USB, AVE-Blue, AVE-TCP, and WLAN driver
- Supports Change Log
- Supports Suspend-Resume
- Synchronization type
 - Two-Wag Sync, SlowSync, One-WagSync from Client Only,
 - Refresh Sync from Client Only, One-WagSync from Server Only,
 - Refresh Sync from Server Only, Server Alerted Sync

About NetFront Mobile Client Suite

NetFront Mobile Client Suite is a comprehensive, flexible, modular, and extensible solution that takes the evolving phonedware category to powerful new levels of efficiency and functionality. NetFront Mobile Client Suite offers mobile device manufacturers and mobile operators an integrated solution that includes a customizable UI, Browser, Messaging Client, Java, Sync Client and more. NetFront Mobile Client Suite leverages ACCESS' extensive mobile technology experience, providing an optimized mobile solution that dramatically reduces development time and expense while speeding time-to-market.
