

# NetFront™ for Series 60

A whole lot of Internet on your mobile phone

## Installation instructions

### Installation

Before you start the installation make sure you have enough free memory on your

- ➔ *If NetFront is already installed, it is recommended to first uninstall the existing version using "Tools/Manager". Existing bookmarks will not be deleted.*

Start the infrared or Bluetooth client application on your computer and send the SIS (Symbian installation) file to the phone. It will arrive as a message on your phone. Go to Inbox and select the message containing the installation file. The file will be automatically saved to the installer application.

Select Install and press [OK].

Read the agreement and if you accept, press [OK]. If you do not accept the agreement, press [Cancel], and the installation will be aborted.

- ➔ *If you receive an "out-of-memory" message during installation, delete the installation file from your inbox after it has been copied to the installer. Go to "Tools/ Manager" and install NetFront manually.*

- ➔ **Memory requirements:**  
**NetFront v3.2 + PDF**    5 Mb free memory  
**NetFront v3.2**            4 Mb free memory  
**NetFront v3.1**            1.8Mb free memory

### Defining your Internet connection

Internet connection settings differ from operator to operator.

- ➔ *The connection for browsing the Internet is often different from WAP or MMS connections.*

Nokia provides a service that sends the settings directly to your phone:

<http://www.nokia.com/nokia/0,1522,,00.html?orig=/phonesettings>

Select "Internet Settings for Applications". The settings will be sent to your phone and automatically installed from the inbox.

Some Nokia phones run a Setting Wizard application:

<http://www.nokia.com/nokia/0,,59240,00.html>

This application configures MMS, Internet, and WAP/GPRS settings for the SIM card inserted in your phone.

### Getting started

After the installation you will find the NetFront icon in the phone's main menu. When you start NetFront for the first time you are asked whether you want to add some links to the bookmarks. Bookmarks include NetFront web page, frequently asked questions and company pages. Those bookmarks will not be removed automatically when you uninstall NetFront from your phone.

### Navigating on Web pages

By default Smart-Fit Rendering™ is activated. To avoid horizontal scrolling Smart-Fit intelligently adapts Web pages to fit in the phone's screen width. You can switch Smart-Fit off in Options/ View. Pushing the cursor control to right or left selects the next or previous link on a page. Use up/down to scroll through the page. NetFront comes with several shortcuts predefined. For example pressing "2" brings you to the end of a page.

The following are the default shortcuts:

- (0) Shortcuts configuration
- (1) (Go to) Top of page
- (2) (Go to) Bottom of page
- (3) Add (page) to bookmarks
- (4) Entered URLs
- (5) Select image
- (6) Open URL
- (7) Find on the Web
- (8) Bookmarks
- (9) Find next
- (\*) Full screen on/off
- (#) Change rendering mode

### Navigating on PDF documents

Some NetFront versions support display of PDF documents. Following commands are available with opened PDF documents:

|                    |   |
|--------------------|---|
| <b>Zoom</b>        | zoom in/out<br>Fit to page/page width     |
| <b>Rotate</b>      | clockwise<br>counterclockwise             |
| <b>Go to</b>       | first page, previous page,<br>page number |
| <b>Page layout</b> | single page, continuous,<br>facing        |
